Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-10 is/are pending in the application.
4a) Of the above claim(s) 6-10 is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 2-5 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species B (claims 1-5) in Paper filed on 27 April 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 6-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper filed on 27 April 2003 (claim 10 is also withdrawn since it depends on withdrawn claim 6).

Response to Amendment

Applicant's arguments with respect to Amended claims 2, 3 and New claims 4-5 based on the amendment filed on 5 January 2004 have been considered but are moot in view of the new ground(s) of rejection. Therefore, this is Final action.

Applicant cancelled claims 1. Therefore, ONLY claims 2-5 are elected.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2871

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The feature of "there is no diffusive plate disposed between the light device and the optical body (LCD panel)" does not disclose in specification and Drawing since Figure 3 shows the an optical laminated body 2 including the diffusing layers disposed between the light device 10 and the optical body 4 (LCD panel). Therefore, these features consider as New Matter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunjima et al. (US5587816A) in view of Liu et al. (US6208466B1).

In regard to claims 2-3, Gunjima et al. teach (Fig. 6) an area luminescence device comprising a light device and an optical body 41 illuminated by the light device from a back surface of the optical body

Art Unit: 2871

wherein

- the optical body comprising an LCD panel (claim 4);
- there is no single diffusing plate disposed between the light device and the optical body (claim 5);
- the light device comprises:
 - (A) an optical laminated body comprising a polarizing plate (polarized light separator 38),
 - (B) a light source supplying light to the optical laminated body,
 - (C) a lens film 37 disposed between the light source and the optical laminated body.

However, Gunjima et al. fail to disclose the optical laminated body comprising a reflective polarizing film disposed between diffusive films, which are in front and back of a reflective polarizing film.

Liu et al. teach (Fig. 9, col. 16 lines 1-9) the optical laminated body comprising a reflective polarizing film 903/901 disposed between diffusive films 905/911, which are in front and back of a reflective polarizing film for reducing glare (col. 24 lines 66-67).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify an area luminescence device as Gunjima et al. disclosed with a reflective polarizing film 903/901 disposed between

Art Unit: 2871

diffusive films, which are in front and back of a reflective polarizing film for reducing glare as per the teaching of Liu et al. (col. 24 lines 66-67).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
